

Department of Electrical and Electronics Engineering

Semester: 1

IIC 7.0 Calendar Activity

Quarter 2

Activity Name	Field Visit To Nandini Hitech Product Plant, Channarayapatna
Objectives	It is an educational excursion where students / professionals visit a dairy plant to observe its operations, processes and technologies involved in milk production.
About the Activity	A Field visit to the Nandini Hitech Product Plant in Channarayapatna is an educational excursion where students or professionals visit a dairy plant to observe its operations, processes, and technologies involved in milk production. Nandini is a well-known brand of dairy products in India, managed by the Karnataka Co-operative Milk Producers Federation Ltd. (KMF). This Plant is one of the production facilities involved in processing milk and producing various dairy products.
Date of Activity	02/12/2024
Place of Activity	Nandini Hitech Product Plant, Channarayapatna
Resource Person	Ms. Deepthi (Admin Assistant) Mr. Ramesh Deputy Manager (Production Wing)
Mode of Conduct	Offline
Time	One Day
Mandatory / Elective	Mandatory
Participants	All 2 nd year students from the EEE Department 3 Staffs from the EEE Department
Activity Outcomes	It offers valuable insights into the working of a modern dairy production facility. It provides practical exposure to students or professionals in the food technology, agricultural sciences, and business management fields. By understanding the processes, technologies, and quality standards used in the dairy industry, visitors gain firsthand experience in how large-scale dairy production works, while also learning about sustainability and product safety.
